

# TuraOffi 2009 Race invitation

11-13.9.2009

## Welcome toTuraOffi 2009

The race is part of Off-Road Orienteering Cup series and is driven with CUP rules, for more information check out [www.4x4cup.com](http://www.4x4cup.com).

The goal of the race is to find control points in the terrain using 4x4 car and the help of GPS and coordinates. Map system is WGS84 and coordinates are given in paper in the format of degree/minutes/parts of minutes (deg/min.mmm). Control point lists are given after car inspection. Control point list in memory stick can be get after drivers meeting in morning.

Car inspection is done by Kai Juvonen. In inspection special attention is focused to car steering parts and general safety of cars.

**Race duration** is 24h + 1h.

Race time is determined by the starting time. Finishing the race has one (1) hour overtime marginal after which the drive is dismissed. Any drives that last more than 24 hours are deductable by two (2) points by every starting minute.

**Control points are checked with digital camera.** Every taken control point must be photographed and the photo must clearly show the cars racing number or license plate number and control point number. The car must be so close to the control point that either the driver or co-driver can reach out and be able to touch by hand the control point sign and their car at same time.

There are about 300 control points that are scored by the level of difficulty. Teams must have their own digital cameras. Cameras must be equipped to handle about 350 pictures at 1024x768 resolutions.

Control points are scored by level of difficulty. Race might include so called "dangerous control points" that only can be retrieved by cars, which have passed the roll cage inspection. Every class has the same control points. Accepted race requires that at least 10 control points are checked in the correct manner.

### Preliminary timetable:

<b>Friday 11.9.</b>	Registration	<b>15:00 – 21.00</b>
	Inspection	<b>16.00 – 22.00</b>
